

# Apollo Kiosk

The Apollo Kiosk is a new distinctive range with LED illumination combining all the versatility to interact with a whole host of information resources through its 19inch capacitive touch screen. Add on a vandal resistant IP65 sealed keyboard and tracker ball and you have an internet access kiosk that you can operate via wireless LAN or static point.

If you require a transactional kiosk then the Apollo comes into its own.

Designed and manufactured in-house from the UK.

## Benefits:

- Secure web browsing
- Stylish and robust design
- Bespoke branding options
- Internet platforms
- Cut queue lengths
- Improved accessibility
