

Tank S2

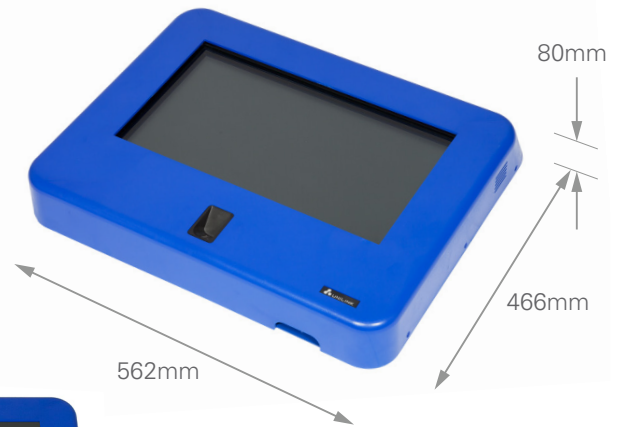

Acante have created the *Tank S2* as a robust and secure kiosk which has been built for reliability. The *Tank S2* is a versatile kiosk as this can come in two options, it can either be wall mounted or with the addition of the base, a floor standing kiosk. The *Tank S2* is a perfect fit for busy environments where the odd knock isn't uncommon. Further to this, the *Tank S2* hosts a multitude of peripherals including printers, card readers and biometric solutions making it easily adaptable to fulfil your requirements.
